Product and ordering information

Frame:	Load-bearing parts of the frame made of solid wood and wood materials, surfaces lined with padded cover.
Seat:	Spring system with permanently elastic steel sinuous springs and upper-side cover. Loose seat cushions made of PUR foam (at least RG35), structured in layers and harmonized in different thicknesses and hardnesses. Seat covered with a ticking (filled with high quality filling material with an admixture of feathers) Cover of cotton wool fleece.
Back:	We exclude "live plucking" for the procurement of these feathers! (For illustration see "Cross-sections and ordering information") Loose back cushions with a ticking (filled with high-quality filling materials contain an admixture of feathers). We exclude "live plucking" for the procurement of these feathers!
Upholstery:	Especially light upholstery is distinguished by its super soft surface. In new condition, the covers exhibit a pronounced wave pattern purposefully based on the design and structure. The upholstery will adjust to the shape of the body and the firmenss of the seat will give a little bit. Minor differences in seat firmness with add-on units are design-based and are therefore not a cause for complaint.
Chamber cushions:	This model features high-quality chamber cushions. The filling material is held in chambers within the cushions to prevent it from shifting. The chambers and the filling material can stand out more or less depending on the type and thickness of the cover material. In order to prevent the filling material from bulging, these seat and back cushions should be plumped up, just like you do with pillows.
Slipcovers:	The covers can only be cleaned chemically! Machine wash is not possible! Further textile labels can be found on the cover.
