Product and ordering information

Frame: Load-bearing parts of the frame made of solid wood and wood materials, surfaces lined with padded cover.

Seat: Spring system with permanently elastic steel sinuous springs and upper-side cover. Fixed seat made of PUR-foam (at least RG 35), structured in layers and harmonized in different thicknesses and hardnesses. Seat covered with cotton wool fleece. (for illustration see „cross sections and ordering information“)

Upholstery: A „particularly casual upholstery“ is characterised by a very comfortable and soft surface. This is achieved, for example, by a ticking with various fillings (e.g. fibres, balls, down, feathers or similar materials). In the upholstery construction, a foam core or foam cushion usually represents the basic upholstery. Already in new condition or after the first use the covers can exhibit a pronounced wave pattern on the seat, back and armrests purposefully based on the design, material and construction which will increase during use. The size of the sewn covers also has a similar influence on sinking and cover stretching. Conclusion: The softer the upholstery and the larger the seat, the greater the sinking in and, ultimately, the stretching of the cover.

Back: Fixed back made of ergonomically shaped PUR foam (min. RG 25). Cover made of cotton wadding.

Miscellaneous: All materials used meet the requirements of the DGM according to RAL GZ 430. The appearance of the stitching may vary depending on the fabric, leather and artificial leather used.

Minor differences in seat firmness with add-on units are design-based and are therefore not a cause for complaint.

The definition of quilted mats and cushions depend on the design and structure.

The appearance of decorative, fell and double seams may vary depending on the fabric, leather and artificial leather used.

All backrest tensioning parts are supplied as standard in their respective original covers.

Material-related information can be found in our fabric and leather flaps on the back with the individual fabric and leather qualities.

All values stated in the price list are approximate measurements in centimetres.

We reserve the right to make changes in form, colour and construction in the course of technical progress.

Functions

Back adjustment: Thanks to the back depth adjustment, you have the choice. The backrest can be fixed in two positions. The basic position, in which the backrest is at the back, provides maximum seat depth. The backrest can also be adjusted a little forwards. This reduces the seat depth, which leads to a more upright sitting position.
